INTRODUCTION

On Friday February 3, 1995 the *DePaul Law Review* proudly presented its fourth annual Symposium. The Symposium, entitled *Cultural Conceptions of Competition: Antitrust in the 1990's*, focused on the mystery of creating and maintaining transnational economic order within the mass of divergent international market systems. With the insight, knowledge and leadership of the Symposium's eight panelists, the conference reflected DePaul's commitment to academic excellence, professional development, and community leadership.

The *DePaul Law Review* is honored to publish the Articles of all eight Symposium panelists: Daniel J. Gifford, Mitsuo Matsu-shita, Michael Peter Waxman, Sergio Garcia-Rodriguez, William E. Kovacic, Andrew I. Gavil, Spencer Weber Waller, and Diane P. Wood. The Articles both exhibit each author's academic achievement as well as allow our readers to share in their personal and professional experiences.

In closing, the *DePaul Law Review* wishes to thank each of the panelists and the many who attended the day long conference. Finally, our sincerest gratitude to those professors whose devotion extends beyond the classroom: DePaul's Professor Brian Havel, Michael Jacobs and Spencer Waller, while visiting from Brooklyn Law School.

Michaelene M. Broniecki
